

Invest in your future

...today

Welcome to Solawise. Based in Beckenham, Kent, we are ideally situated to carry out Photovoltaic installations in London and the south east of England.

We can design a system tailor made to your needs and we will take you through every step of the journey from the initial enquiry to the final handover.

Solar electricity (PV Panels) is a great investment and TAX FREE!

What is solar photovoltaic?

Solar electricity systems capture the sun's energy using photovoltaic (PV) cells to convert the daylight into electricity.

The panels produce direct current (DC) which is converted to alternating current (AC) by an inverter so it can be used by appliances and lighting in the property. These systems are usually connected to the national electricity grid.

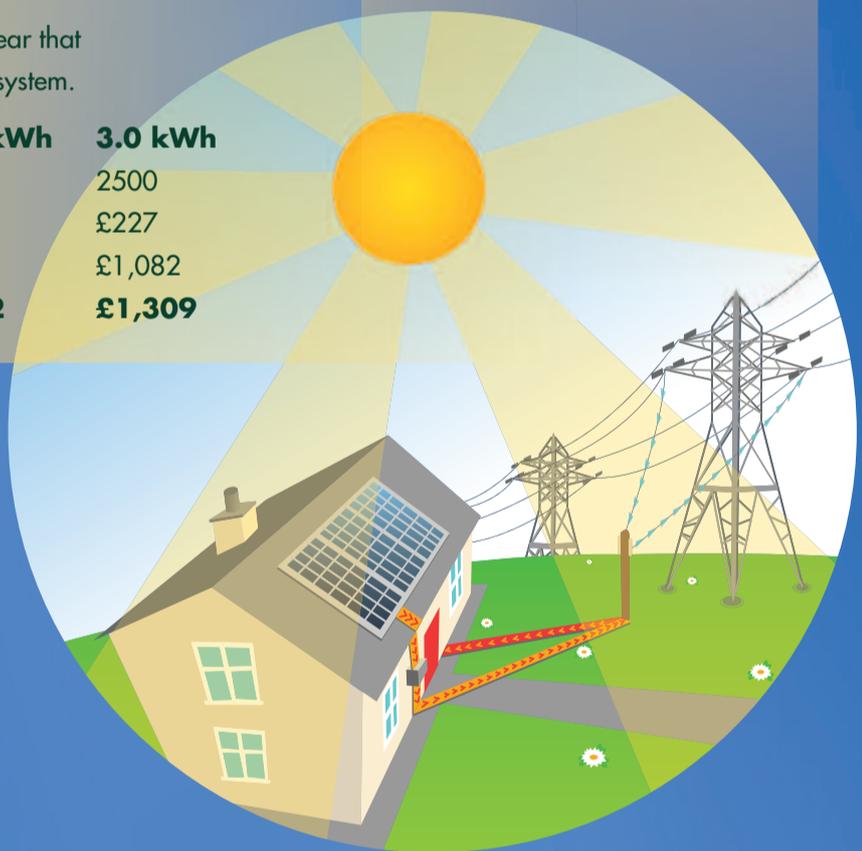

Prices for PV systems vary, depending on the size of the system to be installed, type of PV cell used and the building on which the PV is mounted. Typical prices starting from £6,000.

- **Guaranteed income for years**
- **Feed in tariff**
- **Generate FREE electricity and reduce your energy bills**
- **Sell your surplus electricity back to the grid**
- **Reduce your carbon footprint and CO2 emissions**
- **Easy to install and maintain**

The table below details the estimated savings per year that can be achieved by installing a Solawise Solar PV system.

System Size	2.0 kWh	3.0 kWh
Annual electricity generated kWh	1667	2500
Savings on electricity bill @ 14p per kWh	£151	£227
Feed in tariff @ 43.3p per kWh	£721	£1,082
Total	£872	£1,309

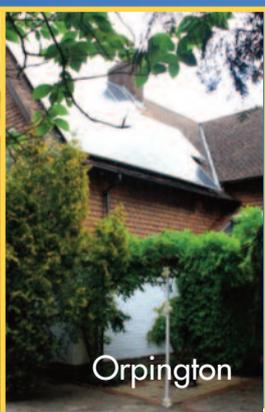

“The suppliers were polite professional and well informed. There were no high pressure sales techniques employed. A proper survey was carried out prior to the quote. The installation was trouble free and completed on schedule. The fitters were efficient & and left the site clean & tidy. All in all, I am more than happy with the system, and can highly recommend this company.”
